527707 - Changing "Result" and "Overall result" text

Component: BW-BEX-ET (SAP Business Warehouse > Business Explorer > Enduser Technology), Version: 2, Released On: 13.06.2002

Symptom

Labeling the results rows with "Result" and "Overall result" is unusual in your company and causes acceptance problems for the solution.

Other Terms

Totals rows, total

Reason and Prerequisites

Solution

The texts can be changed in important cases by a customer modification. In the process, as with all modifications, it can happen that this change is overwritten by a SAP transport (Support Package or upgrade). In such a case, the modification must be carried out again. The change can only be made on a system-wide basis, that is, all query results are issued with the new texts.
Take into consideration that if data from already existing solutions is accessed, for example, with VBA (in the BEx Analyzer), the "Result" or "Overall result" text may possibly be checked and then these scenarios may not work anymore.

If you decide to make the modification, you can adjust the '025' and 'A25' text elements in the 'SAPLRRSV' program.
